WORK EXPERIENCE

Product Manager — Topremit
APR 2025 – JUN 2025

- Authored PRDs, user flows, and acceptance criteria for 3 feature releases, aligning cross-functional teams on user pain points and business objectives
- Led multi-device release coordination and redesigned FAQ discoverability, reducing repeated support tickets by 25%
- Built SQL dashboards to track feature adoption and user behaviour, enabling data-driven prioritisation of product improvements
- Proactively identified and reported 13 bugs pre-release through QA testing, cutting post-launch defect rate by 40%

UI/UX Developer — Inter Pan Pasifik Futures (now TradePro)
AUG 2024 – MAR 2025

- Designed and prototyped responsive UI components in Figma, reducing design-to-dev handoff iterations by 30%
- Built functional front-end prototypes using HTML, CSS, and JavaScript to validate product concepts before full development
- Created technical documentation and led Git training for 5 team members, improving version control adoption across the team
- Refactored legacy pages using Bootstrap, improving page load performance and mobile responsiveness

Web Designer / Web Developer — All in IT Solutions
AUG 2022 - NOV 2022

- Led end-to-end website redesign using HTML and CSS on WordPress
- Designed cohesive brand assets—including marketing materials, business cards, and social media content—driving measurable engagement growth
- Collaborated directly with clients to translate business requirements into visual designs, ensuring alignment with brand identity

Director of Information Technology (Volunteer) — Indonesian Student Association in Australia (PPIA)
JULY 2021 - AUG 2022

- Led a 20-person cross-functional team to redesign the student networking website, increasing user engagement by 40%
- Conducted usability testing and stakeholder interviews to ensure agile feedback loops and continuous improvement
- Implemented GitHub Projects for issue tracking, reducing task completion time and improving team collaboration
- Contributed to frontend development using React.js—designing pages, running user tests, and shipping production code
